to Leslie, me

Good morning,

Please see below in **red** for our response to your open records request:

Any communications between your office and any member of the Georgia Secretary of State's Office concerning an audit of the Dominion machines following the November 3, 2020 General election. **See PDF attached titled ORR09082022.**

Any communications between your office and PRO V&V concerning an audit of the Dominion machines following the November 3, 2020 General election. **No responsive documents in existence.**

Any records of audits or tests performed by PRO V&V in Morgan County from November 3, 2020 to date. **No responsive documents in existence.**

Thank you,

Jennifer Doran
Elections Director
Morgan County Board of Elections and Registration

Jennifer,

Representatives from Pro V&V will be arriving shortly to perform a field audit of equipment on behalf of the Secretary of State's office. These individuals will need access to a random selection of your voting equipment for only a few minutes.

The people who will be arriving around 11:15. The four people arriving are:

Jack Cobb
Ryan Wilson
Hunter Medlock
Michael Walker

to me

Mr. Coover:

Thank you for your request. Paulding County has no emails or responsive documents pertaining to your requests. We did not have an audit of the machines following the November 2020 election. We have no communications with the SOS, Dominion or PRO V&V.

Please consider your request fulfilled.

Thank you,

“A great leader knows the way, shows the way, and goes the way...lead by example.” Unknown

Re: Open Records Request submitted September 7, 2022 @ 4:54pm.

Dear Mr. Coovert:

As County Attorney for Floyd County, I am contacting you on behalf of Floyd County regarding your open records act request dated September 7, 2022. I have checked with our Elections Supervisor, and we have no relationship with Pro V&V. Further, our elections office has only conducted one audit as that term is defined by statute and the SEB rules and that is the risk limiting audit performed by all counties following the 2020 general election.

Can you clarify that you are requesting email or other communication related to that 2020 audit? If you are requesting all email communications, I am certain that the process to retrieve those emails and review and redact them per the Georgia Open records act will cause costs in excess of \$25. It will likely be \$250-\$300. Please confirm that you are willing to be responsible for the costs.

Further, to the extent that the response will require input from elections staff, at this time, our very limited number of staff members are required to give priority to duties related to the 2022 General Election. Due to the tremendous number of open records act requests Floyd County is receiving regarding elections matters, it is impossible to determine when staff will be able to give attention to those requests and it may be after the November Election before many of them can be addressed.

Coovert
ORR 09.12.2022
Page 2 of 2

Staff will be attempting to review open records act requests in the order they are received unless a request is very limited and/or redundant of previous requests so that a response can be completed in less than 15 minutes. Staff will give attention to these requests whenever their duties necessary for the 2022 General Election allow. When staff can review your request and give a more detailed estimate of costs and a date upon which they can expect to be able to complete the response, you will be notified.

Please be advised that OCGA 50-18-71(a) provides that “[a]ll public records shall be open for personal inspection and copying, except those which by order of a court of this state or by law are specifically exempted from disclosure.”

Yours very truly,

VIRGINIA B. HARMANN
McRAE, SMITH, PEEK,
HARMAN & MONROE, LLP

The Center for Election Systems did an audit at one point. I don't know if they contracted with a vendor to assist with that or not.

Ms. Janine,

Did Pro V&V ever do a forensic audit or review of your machines after the 2020 general election?

Thank you!

Kevin

Spalding County

Elections Supervisor: Kimberly Slaughter

Robert Coover had a call with Spalding County Elections Supervisor, Kimberly Slaughter on 9/12/22. Robert Coover also spoke to a Spalding County election's technician on 9/11/22.

Question asked by Mr. Coover: Is there any communications between your office and any member of the Georgia Secretary of State's Office concerning an audit of the Dominion machines following the November 3, 2020 General election.

Answer by Elections Supervisor: Ms. Slaughter did state that she started after the November 2020 elections but she has not seen or heard of any communications associated with Pro V&V or this audit. The election tech who was there during the 2020 election did state that he was not aware of any audit conducted on the voting machines by Pro V&V.

Any communications between your office and PRO V&V concerning an audit of the Dominion machines following the November 3, 2020 General election.

No

Any records of audits or tests performed by PRO V&V in Spaulding County from November 3, 2020 to date.

No

Thank you for the documents returned in response to my ORR; however, I have not received the specific images requested which are specifically detailed in the field audit report below. Can you please advise if they exist and if so please provide:

3.2 Audit Configuration

An ICX was selected at random from the warehouse in each county. The team member then photographed the seals and the device. All seals that needed to be removed were then removed. After all photographs were taken, the team member inserted a clean USB drive from Pro V&V into left hand access compartment. Next the team member then plugged in the unit and powered it on. At the prompt the team member inserted a Tech Key smart card and selected the option to "Extract Application". The team member then verified the SHA-256 generated by the unit and photographed the popup screen. The team then took the USB drive containing the exported application to a Pro V&V laptop to compare the SHA-256 hash values to the known value from previous testing.

An ICP was selected at random from the warehouse in each county. The team member then photographed the seals and the device. All seals that needed to be removed were then removed. After all photographs were taken, the team member removed any compact flash cards under county supervision and inserted two compact flash cards (one blank and the other containing techextract.exe that was created by Pro V&V during certification testing). The unit was plugged in and powered on. A password was entered and a tech iButton was then read by the ICP and the option to "Extract Firmware" was selected. The compact flash cards, if present, were returned to the same ICP. The team member then took the compact flash card containing the exported firmware to a Pro V&V laptop to compare the SHA-256 hash values to the known value from previous testing.

An ICC was selected at random in each county central office if there were multiple units. The team member then photographed the device. The county provided the credentials to login to the workstation. The Pro V&V team member navigated to the ICC folder on the root of the workstation and copied all application files onto a Pro V&V USB drive. The team member then took the USB drive containing the exported firmware to a Pro V&V laptop to compare the SHA-256 hash values to the known value from previous testing.

Thank you,

Kevin Moncla
